CHAPTER -1 SUPPORT AND RESISTANCE

SUPPORT & RESISTANCE

In trading, "support" refers to price levels where buying pressure is strong enough to prevent further price declines, while "resistance" signifies levels where selling pressure is strong enough to prevent further price increases

CHAPTER -2 CANDLE STICK PATTERNS

WHAT ARE CANDLE STICKS ?

Bullish Candlestick

Bearish Candlestick

Candlestick patterns are visual representations of price movements within a specific time frame, displayed on a candlestick chart, that traders use to identify potential market trends and reversals

IMPORTANT CANDLESTICK FOR BULLISH (BUY)

BULLISH CANDLESTICK PATTERNS

Bullish candlestick patterns, typically green or white, signal potential upward price movements, indicating a shift from a downtrend to an uptrend or a continuation of an existing uptrend.

IMPORTANT CANDLESTICK FOR BEARISH (SELL)

BEARISH CANDLESTICK PATTERN

📈 📉 📊 📋 📌 @Thechartcorner

A bearish candlestick pattern is a formation on a candlestick chart that signals a potential reversal from an uptrend to a downtrend, indicating a shift in market sentiment from bullish to bearish, suggesting an impending price decline.

CHAPTER -3 CHART PATTERNS

WHAT ARE CHART PATTERNS ?

Chart patterns are visual representations of price movements on a chart that traders use to identify potential trends and predict future market behavior, based on the idea that past price action can offer clues about future price movements.

IMPORTANT CHART PATTERNS FOR BULLISH(BUY)

Bullish patterns may form after a market downtrend, and signal a reversal of price movement. They are an indicator for traders to consider opening a long position to profit from any upward trajectory.

IMPORTANT CHART PATTERNS FOR BEARISH(SELL)

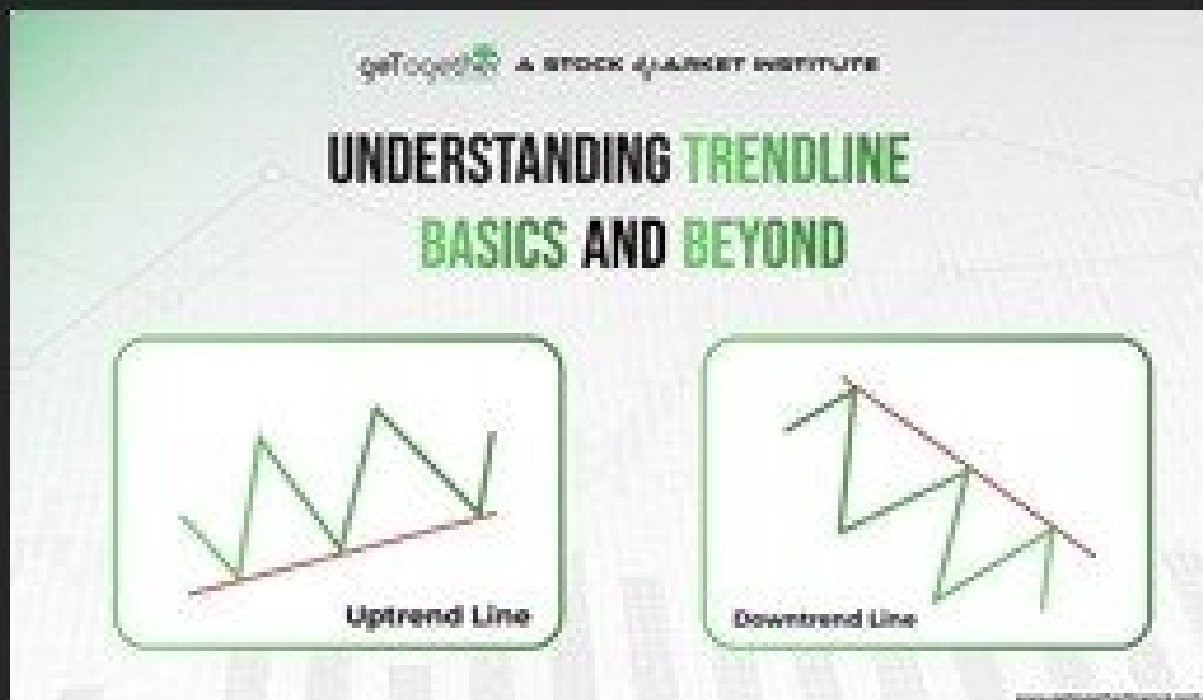

Bearish Chart Pattern

bearish chart patterns are the shape or visual graphic presentation of price action on stock charts that suggest a decline in the price. They help traders predict when a stock might fall in value and sellers dominate buyers.

CHAPTER - 4 TRENDLINE

WHAT IS TRENDLINE?

In trading, a trendline is a straight line drawn on a price chart that connects two or more significant price points, acting as a visual guide to identify the direction and potential movement of an asset's price

UPTREND LINE

In trading, an uptrend trendline, also known as a support trendline, is a line drawn below a series of higher lows on a price chart, indicating a bullish trend where prices are generally rising. It acts as a visual representation of support and helps traders identify potential buying opportunities and assess the strength of an uptrend.

DOWNTREND LINE

In trading, a downtrend trendline is a downward-sloping line connecting a series of lower highs on a price chart, indicating a bearish trend where prices are generally falling, and acting as resistance

CHAPTER - 5 HOW TAKE ENTRIES ON THE SUPPORT AND RESISTANCE

HOW TO TAKE ENTRY ON SUPPORT AND RESISTANCE ?

To take entry on support, identify potential support levels using price action, trendlines, or indicators, and then enter a long position when the price bounces off the support level, ideally after a confirmation of buying pressure.

Here's a more detailed explanation:

1. Identifying Support Levels:

•Price Action:

- Look for areas where the price has consistently found support in the past, forming a "floor" that prevents further declines.

•Trendlines:

- Draw trendlines connecting multiple lows to identify potential support zones.

CHAPTER - 6 HOW TAKE ENTRIES ON THE CANDLE STICKS

To take entries based on candlestick patterns, identify patterns like bullish or bearish reversals, confirm them with other technical analysis, and then enter a trade based on the pattern's confirmation, using stop-loss and profit targets accordingly.

HOW TO TAKE ENTRY ON BULLISH CANDLESTICK

BULLISH MARUBOZU CANDLESTICK

To take an entry on a bullish candlestick pattern like the bullish engulfing, look for a small bearish candle followed by a larger, bullish candle that completely engulfs the previous one, often indicating a potential trend reversal.

HOW TO TAKE ENTRY ON BEARISH CANDLESTICK

To take an entry on a bearish candlestick pattern, identify a pattern like a bearish engulfing, confirm it with other technical analysis tools, and then place a short position with a stop-loss above the pattern's high, aiming for a potential downtrend.
